THE SLAVE TRADE.

"All that is exalted in station, in talent, and in manly character among our countrymen, is firmly united for the suppression of this infamous traffic,"—lohn Randolph's Address to the African Institution of London, May, 1822,

What a proud recollection to every philanthropist, that the spirit of humanity and justice has so far triumphed over cruelty and the greediness of avarice, that a public seal of infamy is now attached to this odious traffic in human flesh, by nearly every Christian nation in the world-And, although this cruel and unnatural practice of stealing and enslaving the inoffensive natives of Africa is still carried on, by abandoned and lawless individuals, to the dishonour of the Christian name and the disgrace of civilized governments, the time is not remote, when this stigma shall be wiped away, and this prolific source of human suffering and sorrow no longer exist. From the annals of history, we learn that the Portuguese and Spaniards were the first to lead the way in this unrighteous traffic! they were followed by the English, the Dutch and French in succession, who visited the shores of Africa, made conquests and established depots of trade, not indeed for a beneficial interchange between man and man, but as marts of slavery and blood. In 1619, a vessel from Guinea arrived at James Town in Virginia, where the unnatural cargo of human beings were sold to the settlers, and the foundation of that scene of human misery and degradation first laid among us which tarnishes the escutcheon of our liberty, and as a national evil, impends over us as the blackening sky, full of awful presage-Among the first advocates for the abolition of this iniquitous trade, and to put forth the claims of the wretched obects of it to the common rights and objects of humanity, the Quakers seem to have taken the lead. So far remote as the vear 1656, some pious preachers of that sect, came from England to this country, to preach the Gospel and deseminate their peaceful principles, and though they were persecuted by the government as discould extinguish their zeal for righteousprotest in the name of God, against every species of cruelty and oppression. " They exhorted," says the historian of their miswho held negroes as slaves, to exercise love and charity towards them, as fellow beings equally favoured with the illuminating grace of God."-The followers of Fox and Penn were the first, as a public body, to affix the seal of infamy to this disgraceful trade. More than a century ago, they protested against the unlawfulness of importing, buying, or holding mankind in slavery, and they have not ceased to hold forth the inconsistency of the practice in the Chrisof the Christian name, have united their efforts in the worthy cause, and by zeal and perseverance have contributed to the glorious success of a cause which has now become the cause of Kings and Emperors, and forms one of the first diplomatic articles in the arrangement of treaties and compacts between nations. Thus commenced the first dawn of emancipation, and the great work of benevolence and humanity is gradeally but surely advancing towards meridional splendour. May that day soon come, that shall bring with it a restoration of their just rights to every in-

RECLUSE.

IDLE HOURS, No. 1.

It is not with the vain hope of gathering ionour or emolument from the exposure, that the writers of these essays offer themselves the candidates for public favour .-Neither is it their design to rouse the dormant spirit of political or religious controversy, nor

"To crush young genius brightening into day," either by the severity of unmerited criticism, or the extravagance of injudicious praise. The path they have chosen is one, which, though it has been trodden before them, may still possess some secret wind-

ings that have never been explored; it may thibit some brighter spots over which the idler may have never wandered; and there yet may bloom some flowers which the poet may have passed as unworthy of being gathered. It may open to the view of bserver some grotto where Reflection would be happy to reside, or it may disclose some fairy bower in which the angel form of Beauty would delight to slumber. And if the writers should at any time be drawn aside from the even tenor of their romantic way, it will be to warn intruders that it is sacred to the pursuits of Literature. Our lucubrations will be occasionally composed of Poetry, and whether it be o' a general or satirical character, we hold ourselves the advocates of the principles it may inculcate.

THE SOLDIER OUTWITTED. 'Twas once in time of public care, When every man his load should bear; And men by thousands had been drafted, To be o'er ocean's billows wafted; To conquer there or bravely die, And gain, in print, the nation's sigh, A hero of ignoble fame, Who merely wisted to raise his name By making combs with nicest care, That ladies might with bonour wear, Was ordered by his country's laws To march, a soldier in her cause, To fight her battles far away. Nor lose a moment in delay; A Captain in a formal tone, Addressed this man of horn and bone. And told him, "Sir, your name I've writ, "Upon this little parchment bit, "And you're a soldier to oppose

- " Your nation's rude, rapacious foes, "So leave your polished saw and comb, " Nor cast one fingering glauce on home,
- "To-morrow, o'er the ocean's wave " You rush to glory of the grave."
- " Friend," quoth the artist in surprise, " So weak a soldier you'd despise,
- " For know, sir, I'm too young to fight, "Howe'er in slaughter I delight."
- " Too young for battle, and of age," Replied the Captain, in a rage.
- "Too young indeed sir," was the man's reply, " My teeth I'm cutting, Captain, so Good-bye."

FOR THE SATURDAY LVENISS POST.

It is somewhat surprising to behold, how much prejudice and passion predominate in the mind of man, and extend their baleturbers of the peace, yet no severities ful influence even over his most solemn acts, especially in that momentous transness, nor damp their pious resolutions to action of disposing of his estate by will to his offspring, whereby he makes a law to govern, and as it were affixes his seal to the destiny of his children and even his sion, "the inhabitants of these colonies children's children. And how much it is to be regretted, that caprice, or any other unwarrantable motive, should ever sway a man to make a marked distinction among those who have by nature an equal claim to his protection and to his bounty-how much it is to be deplored, that undue partiality should be permitted to rob one child to make another rich-but how frequently do these occurrences take place; and mark the natural consequences of this distributive injustice-hard thoughts, intemperate tian system of fellowship and brotherly language, family feuds and law suits, wherelove-Many strenuous advocates for the in brother is found against brother and the abolition of slavery among other professors daughter against her mother-in-law-envy, up they halted, and only two of the guard wrath and malice, rankles in the bosoms of kindred of the same blood, where peace, and love, and harmony ought ever to reign Jasper and Newton seized two of the mustriumphant-Now here is matter of the kets, and disabled the two sentinels. Much evil would be thus prevented and the happiness and repose of families would be permanently secured; whereas, any partial determination, not founded upon equality of rights and reciprocal advantage among the heirs, is certain to be followed with consequences inimical to the peace of families, and often derogatory of the good name, and reproachful to the reputation of the deceased testator. The present existing law of this commonwealth, for the distribution of property left without

SERGEANT JASPER.

" At the commencement of the revolutom of the ditch on the outside of the its motion forever." He expired a few works. This accident was considered by moments after closing this sentence. the anxious inhabitants of Charleston, as the American flag to the enemy. The mowhich he tied to a sponge staff and re-planted them on the parapet, where he sup-ported them until another flag-staff was procured. The subsequent activity and enterprize of this patriot, induced Culonel Moultrie to give him a sort of roving commission, to go and come at pleasure, confident that he was always usefully employed. He was privileged to select such men from the regiment as he should choose to accompany him in his enterprizes. His party generally consisted of five or six, and he often returned with prisoners before Moultrie was apprized of his absence. Jasper was distinguished for his humane capital of his kingdom. It was first taken treatment, when an enemy fell into his power. His ambition appears to have been imited to the characteristics of bravery, humanity, and usefulness to the cause in which he was engaged. When it was in his power to kill, but not to capture, it was his practice to permit a single prisoner to escape. By his sagacity and enterprize he often succeeded in the capture of those who were lying in ambush for him. In one of these excursions, an instance of bravery and humanity is recorded, by the biographer of Gen. Marion, which would stagger credulity, if it was not well attested. While he was examining the British camp at Ebenezer, all the sympathy of his heart was awakened by the distresses of a Mrs. Jones, whose husband, an American by birth, had taken the King's protection, and been confined in irons for deserting the royal cause, after he had taken the oath of allegiance -Her well founded belief was that nothing short of the life of her husband would atone for the offence, with which he was charged. Anticipating the awful scene of a beloved husband expiring upon a gibber, had excited inexpressible emotions of grief and listraction.

Jasper secretly consulted his companion, Sergeant Newton, whose feelings for the distressed female and her child were equally excited with his own, upon the practicability of releasing Jones from his impending fate. Though they were unable to suggest a plan of operation, they were determined to watch for the most favourable opportunity, and make the effort. The de-parture of Jones and several others, (all in irons) to Savannah, for trial, under a guard consisting of a sergeant, a corporal, and eight men, was ordered upon the succeeding moraing. Within two miles of Savannah, about thirty vards from the main read, is a spring of fine water, surrounded by a deep and thick underwood, where travellers often halt to refresh themselves with a cool draught from the pure fountain. Jasper and his companion considered the spot the most favourable for sidered the spot the most favourable for solid tock.

The irons were taken off, and arms put in the hands of those who had been prisoners, and the whole party arri-

There are but few instances upon record where personal exertions, even for self-preservation from certain prospects of death, would have induced a resort to an act so desperate of execution; how much more laud, ble was this, where the spring to action was roused by the lamentations of a female unknown to the adventurers.

Subsequent to the gallant defence at Sullivan's I-land, Col. Moultrie's regiment was presented with a stand of colours by Mrs. Efficit, which she had richly embroi dered with her own hands, and as a reward for Jasper's particular ment, Gov. Rutledge presented him with a very hand-some sword. HISTORY OF JERUSALEM.

According to Manetho, an Egyptian historian, Jerusalem was founded by the shep-herds who invaded Egypt in an unknown period of antiquity. According to Jose-phus, it was the capital of Melchizadec's kingdom, and built in honor of that prince,

capital of his kingdom. It as first taken in the days of Jehoa h, by Hazael, king of Asseria, who slew all the nobility, but did not destroy their city.

It was afterwards taken by Nebuchadnezzar king of Babylon, who destroyed it and carried away the inhabitants. Seventy years afterwards permission was granted by Cyrus, King of Persia to the Jews to rebuild their city, which was done; and it continued the capital of Judea till the time of Vespasian emperor of Rome, by whose son Titus it was totally destroyed.

It was however rebuilt by Adrian, and seemed likely to recover its former grandeur; but it flourished for a short time only. When the empress Helena, mother of Constantine the great, came to visit it she found it in a most forlorn and ruinous situation.

Having formed a design of restoring it to its ancient lustre, she caused with a great deal of cost and labor, all the rubbish which had been thrown upon those places where our Saviour had suffered, been buried, &c. to be removed.

In doing this, they found the cross on which he died, as well as Gose of the two malefactors who suffered with him. She then caused a magnificent church to be built, which enclosed as many scenes of our Saviour's sufferings as could conveniently be done.

This church, which stands on Mount Calvary, is still in good repair, being sup-ported by the donations of pilgrims who are constantly resorting to it. Here is to be seen our Saviour's sepulchre, hown out of solid rock; and the very hole in the rock on which it is said the foot of the cross was fixed, with many other curiosities.

ed the guard, and concealed themselves is said that the emperor Julian attempted to rebuild it, in order to give the lie to or Saviour's prophecy, namely, that it should be totally destroyed without one stone being left upon another. In this, however, he was defeated by earthquakes, fiery eruptions, &c. which destroyed his materials, and killed many of his workmen.

At present Jerusalem is but a poor thinly inhabited town, about three miles in circumference surrounded with mountains on all sides except the north, with steep ascents and deep vallies.

CURSING ACCORDING TO LAW.

Some years since, when a scarcity of grain prevailed in Connecticut, a poor man, by the name of Crocker, went to a rich farmer, whom he knew to be possessed of a surplus of Indian Corn, and tendered him the highest price for a bushel of it; but the farmer refused to sell, pretending that he had none to spare, whereas, it was evidently false; and that he only hoarded it up for the present, as some now do, in order to starve buyers into the necessity of giving them the extortionate price they wished to take,-Upon this Crocker gave him his true character, in which, it seems he did not take the name of God in vain. MIDNIGHT REFLECTIONS.

"Tis midnight-all is calm-how deep the silence that prevails; at present scarce a sound is heard to break the solitude profound, except the incessant music of the songsters of the night, which affords a pensive pleasure to the contemplative mind. The sable curtain of darkness hovers o'er creation, tinging each bud and blossom with a deeper bae, and inviting to repose author of all good, to send forth the awful mandate, and cause the impressive language of, " thou shalt die, and not live!" to be sounded in his intellectual ear) he could meet with composure the King of Terrors, even with that celestial smile that rests upon the countenance of the Christian, when about to bid an everlasting farewell to mundane enjoyments, when he resigns his spirit to him who gave it, and his tired soul weary of all below, " looks to its God, and plumes its wings for Heaven."

Hark! what sound is that-I seem to hear its near approach-it echo's through the air, and re-ealutes my listening ear. 'Tis nought but the voice of him, who endeavouring to fulfil his appointed station, is now performing his nocturnal visits, and loudly proclaiming the hours as they fly; his duty is to guard the drowsy multitudes that surround him, many of whom are at this moment, fast lock'd in the arms of Morpheus. But, vain man, place not thy whole dependence in an arm of flesh, for except the Lord keep the city, the watchman walketh but in vain."

COMMUNICATION - A Mr. Grans, Lottery ker, of this city, has been recently exhibiting his state a curious piece of mechanism, said to the work of an Italian artist. It consists of a be the work of an Italian artist. It consists of a box four inches long, three wide, and two deep-of fine gold. On one end is a snull box—on the other, a lid opens and discloses an eight day time piece, which, besides striking the hours and quarters, plays a number of beautiful times. But the most beautiful part is, that on setting a spring, a picture on the top of the box rises slow-ly, and discovers a bird ascending from below. The bird is of about an inch in length; of pirmage the most rich. and yet the most natural. It sings the most rich, and set the most natural. It sings with automating sweetness, and accompanies its soice with all their motions common to a living bird—its bead turns from side to side—its little thill opens, and list throat swells at every note, and its wings and test spread and contract during its song. After repeating and finishing its strain, it drups upon its poiden nest, descends to its retreat, and the ful gently closes to its place. ---

Rome, Ava. 1 .- According to the Court Calender this year, the present Pope is 80 years old, and has reigned S2 years; the umber of fiving cardinals are 44, of whom only two were created by the late Pope Pius VI. the number of vacant hats in the sacred college is 23, of which three are in petto. Since the election of Pope Pius VII. 83 cardinals have died, and he has as yet created only 82. The number of patriarchs, archbishops, and bishops, scattered over the Christian world, amounts to 550, exclusive of those in partibus infidelium; in Rome 26 of the cardinals consist of prelates and religious of the assembled congregations, who are employed partly in state and partly in religious affairs.

When the Ukase of the late Emperor of Russia appeared concerning the form of the hat, the son of an English merchant, with a view to baffle the police, appeared in the streets of Petersburg, having on his head an English hunting-cap, at the sight ge of which the police officers were puzzled.

"It was not a cocked hat," they said, " neither was it a round hat." In this embarrassment they reported the affair to the Emperor. An Ukase was accordingly promulgated, and levelled at the hunting-cap; but not knowing how to describe the anom aly, the Emperor ordained-that " No peron should appear in public with the thing on his head ween by the merchant's son."

AN INTREPID ÆRONANT.

A young aronaut, of the name of Fassy, lately made an ascension at Matseilles, which was very near proving fatal to him. At five o'clock in the vening the balloon arose in presence of numerous pectators; the hasty disappearance of the object of their attention soon spread general alarm, when they again perceived the balloon, and discovered that it had lost its spherical form, and discovered that it had lost its spherical form, and falling with terrific rapidity. The most dreadful conjectures were now formed and every one crowded to the spot where M. Fassy intended to have descended. Soon they learnt that he had come down in perfect safety near the hamlet of St Charles. Blucher's Manument .- It is known that the late Field Marshal Blucher had selected a spot between Criblowitz and Waigwitz, to be the place of his interment, over which he had expressed a wish that the only memorial of his interment should be a plain stone. After considerable search, a great mass of granite was found on the south side of the mountain Zobten, near Gorkan, out of which a cube of 24 Rhenish feet in breadth, and the same in height, was to be cut, in order to be placed over the grave. When the cutting had proceeded to about thirteen feet deep, it was found that the mass of grunite was cu through by a layer of crumbling clay; in consequence of which the monument can not be more than thirteen feet in height besides not being an exact cube. The block is still considerable, and will weigh from 10,000 to 12,000 quintals. For three years, a master stone-cutter and sixteen assist

LONDON, Oct. 8 .- Capt. Alvey. a citizen the insurgent guards at Madrid, in July last, reached London yesterday. On the of Vittoria, on the highest part of the road over Mount Salinas, he observed a detachment of the rebels on the top of the hill, about musket shot from the road, amounting to about 200 men. They sent six of their number to search his carriage; from which they took four large packages of papers, addressed by Mr Forsyth, the Minister of the United States at the Court of Spain, to Mr. Adams, the American Secretary of State. They spared his watch and his clothing, and after extracting a pecuniary gratification of 85 each, having otherwise civilly treated him, suffered him to proceed. They overhauled some letters and papers, which were concealed in the lining of the carriage.—The principal object of the banditti, judging from the position which they occupied, seemed to be to intereept all communication to Madrid from France, and from the frontiers. Their position commanded an extensive view in that direction: but scarcely any in the direction of the capital. In the vicinity of this mountain there were three small divisions of in-surgents. Capt. Allen, commander of the U. S. schr. Alligator, has fallen in the service of his country! He was shot by two musket balls through the body, in an engagement with a gang of pirates, amounting to about 800, stationed in the bay of Siquapa, about 15 leagues to the windward of Matanzas. He was in the foremost boat of a division which attacked the principal vessel of the pirates, mounting an 18 pounder on a tack on some part of the coast. He had forwarded swivel, and 14 other guns, with the bloody a despatch ordering the frigate Legera, and brig flag nailed on the mast, and which, by his intrepidity and daring, they succeeded in capturing after a very desperate actionbut not before the crew had all made their escape, except one, some in their boats and others by swimming. Capt. Allen died four hours after receiving his wounds.

When wit and beauty are caught in the toils of villainy and become the victims of designing rogues something more is due to couriesy and common feeling than to allow the case to pass with the in-

difference of a vulgar larceny.

Mrs. Rogers. (as she must now, we suppose, to her pain be called) was a spruce, lively, dashing young girl of 17. from the south, and residing at Elizabethtown. About four months ago, a certain Mr. Rogers, who had then lately become a pretty good customer, as the language of the fancy runs, at our Police, was convicted of two petit larcenies, and sentenced to the penitentiary a considerable time on each. After a short time however he was pardoned out on coudition of leaving the state. rable time on each. After a short time however he was pardoned out on condition of leaving the state, and never returning to it again. His first movement was to Elizabethtown, (N.J.) where, upon two interviews, with the aid of genteel manners and appearance, he ingratiated himself so fatally with a young heiress of the south, the aforesaid fair blossom of 17, the said '4rs. Rogers—they were immediately married. Four d ys passed of the honey moon; the blossoms of hope spread wide and beauteous to the eye. The fifth 'day comes a frost! a killing frost?' His recent Hiography in New York is revealed! the lovely-bride flics from him in diagust and horror. He pursues her to New York; gust and horror. He pursues her to New York; she urges him, and gives him money to return :-ie promises, but wastes his money among his pro-ligate associates, and then demands of her to give fligate associates, and then demands of her to give him more. Again she give him money, and again is only exposed thereby to the same importunity, aggravated with horrid threats, and letters the most vulgar, brutal and abusive.

The Police became conversant of these facts about four days ago, and Mr. Rogers was arrested, and comfortably returned to serve out his original term of service on the stepping mill.

A divorce, we understand, is on foot.

At a Court of Oyer and Terminer, held n the County of Washington, Pennsylvania, on the 21st and 22d days of November, before Judge BAIRD and his associates, William Crawford was tried, and convicted of Murder in the first degree, for shooting his own Son, Henry Crawford, on the 30th of July last.

At 9 o'clock on Saturday morning, the 23d of November, Mr. Kennedy laid some grounds for a new trial in consequence of error in record. The motion was overruled and the court passed the following sentence:

"That the prisoner be taken from hence to the jail of the county of Washington, from whence he came, and from thence, to the place of execution, and there to be hanged by the neck until he is

TO CORRESPONDENTS.

We think we recognize in the "Mid-night Reflections," the hand writing and the pure sentiments of one of the "better part of creation." The favour having came too late for insertion in its proper place, we have made room for it in our inner page, where it will meet with the attention it deserves from our readers.

The lines of our correspondent B. W. were marked for insertion, but a younger brother of the "Nine" happening to easy them, and not having in his mind's eye the fable of the "boys and the frogs," made such a wicked criticism upon them, as to consign them to the "shades." Turning round to take up the critic's poisoned dart, "a still, small voice" whispered us,

Education and Genius.

I shall endeavour to amuse and instruct your readers, by writing an essay on edu-cation, and shall commence with the following quotation :
"O education I one thee much."

I suppose the author who exclaimed the above exclamation, owed his teacher something considerable; a very common com-SCINCE.

"Tis education forms the common mind,

It is also observed by Dryden, Virgil, Milton, or some other Greck poet, that it

" Delightful task to ride the tender goat, To teach the young ideat how to shoot, To pour the fresh construction o'er the mine, o drink enlivening spirits, and to let be generous porpoise in the glowing breast,"

Which proves that riding on goats, shoot ing marbles, constructing bridges over coal mines, drinking spirits and harpooning porpoises were formerly considered as parts of a polite education. Were I to might not be believed; but such is the fact: I actually composed them extempore, after two hours hard study:

Who for the trilling matter of a dollar, Would not have his sons and his daughters a good skoiler!

But I have said enough to prove incontestibly that education is a very useful branch of the mathematics; and also to prove, that a person to whom is committed the instruction of youth, ought to have some trifling abilities himself. The legislature of a sister state, has thought so, and acted upon it, perhaps ours, may at some future period, bestow a thought on the subject of LVil. Record. education.

THE WONDERFUL PROPHET.

He is not Noah's son, nor an old Levite, nor John the Baptiat, nor yet the Wandering Jew—he was before any of them, he generation was before Adam, with whom he was in the Garden of Eden. He was also with Noah in the Ack, and near Christ He was also with Noah in the Ack, and near Christ at his trial before Pontius Plate. The Scriptures make frequent mention of this prophet, yet he terver knew his father, nor his mother—he walks barefooted and hate legged, like an old Friar, and wests neither hat, cap or bother, nor any manner of head attire—his coat is neither woollen or linen, saik, hor, or cetton, bark, leaves, nor sheep skin, and yet it abounds with a variety of colours, and fits close to his body, without either seam, button, hoop or girdle, or stitch of a needle—he is not full feet high, and carries neither stick, sword, rance fret high, and carries neither stick, sword, cane, 4 feet high, and carries neither stick, award, cane, to any thanner of warlike instrument; and yet be encounters his cuemies fiercely and often kills them on the spot. He takes no money, neither loses any, nor is be provident for the time to come, a counting it sufficient when the day comes to provide for it. He is not fond of worldly pomp or previde for it. He is not fond of worldly pomp or grandeur, for he would rather lie in a farmer's bare than in a king's patace; he is wonderfully temperate, for he would rather drink clear water, than the strongest laptur on earth—he never was marred, but he has sevent favourites whom he haves greatly, for if he has but one morsel of meat, he divides it amongst them, yet he is ant to be peabous and would rather venture his the than countenance a rival—he is neither why nor tory, conformist nor non-conformist, for he holds no articles of the Christian faith, neither doth he dray any of them—he writter gues to church. dray any of them—he untiler goes to church, meeting or synagogue for conscience sake, and as for Mass he access to go over the door to hear it she is not fond of fresh most on Fridays or Satur-days, nor vet all Lent throughout-he once preached an eminent sermon, before a man who thought to thwart him therein, but in the end brought tears in alundance from his eyes, he is very argent in proclaiming with outstretched arms that the day of the Lord is at hand, and at arms that the day of the Lord is at hand, and the vaice of his prophecy, the doors and windows open-site speaks on language perfect, yet all then
